

## REMARKS

The amendments to the Specification correct errors made in the original application regarding the use of trademarked products and trade names. It also corrects the omission of the ATCC deposit number and the omission of the word "between". One amendment adds the "priority claim" to the Specification. This amendment is being added at the time of filing of this patent application. It is recognized by Applicants that the sentence will need to be amended again to add the patent number once U.S. Application 09408,328 issues. No new matter is added. Applicants respectfully request that the amendments to the Specification be entered.

In the Claims, Applicants cancel Claims 1-20 and add new Claims 21-35. Support for new Claims 21-35 are found throughout the Specification starting on page 6. There are four independent claims and a total of fifteen claims.
